## **AMBIENTNAV ALPHA MARINE MONITOR FAMILY NOW SHIPPING**

*Marine and Military Class Monitor with SeaEye™ Technology Offers  
Direct Sunlight Viewing and Adaptive User Interface*

**Lynnwood, Wash.** – AmbientNAV, a leading manufacturer of high quality marine and military-grade monitors and computer systems, announced today its Alpha family of daylight and sunlight viewable monitors is now available at marine retailers, boat yards and marine retrofitters throughout the United States and Canada.

Manufactured in 15-, 17- and 21-inch models, Alpha monitors integrate AmbientNAV's exclusive SeaEye technology combining cutting-edge electro-optics with sound engineering design practices to deliver unparalleled performance and reliability to the boating community. SeaEye's innovative design principles provide the monitor with bright, clear and easy to view imagery, which is vital to the safe and low stress operation of boats, yachts, and ships. Incorporating advanced thermal management techniques, the electronic components of Alpha monitors are isolated and in a separate compartment, protecting them from corrosive water, humidity and sea air. Alpha's LED-backlighting operates between 1200 to 1/2-nits allowing boaters to smoothly transition illumination from full to dim brightness instantly. With a service life more than twice as long as competing solutions, the monitor's backlight function offers users longer high-bright life at lower overall heat. Alpha's On-Screen Display (OSD) and user interface improves setup and operation with third-party marine electronics products. Offering boaters superior visual and operational performance in a compact, visually appealing design, AmbientNAV's new Alpha monitors are the epitome of form and function.

### **Pricing:**

The AmbientNAV Alpha monitor line has a suggested retail price starting at \$4,495 for the entry-level 15-inch model and range up to \$11,995 for the top-of-the-line 21-inch model. For more information on the new AmbientNAV Alpha monitors, reseller locations, SeaEye Technology, AmbientNAV and/or its complete line of high-performance marine products, please contact 425-248-2096 or visit [www.AmbientNAV.com](http://www.AmbientNAV.com).

### **About AmbientNAV:**

AmbientNAV, based in Lynnwood, Washington, is a manufacturer of high-quality LCD monitors, computers and peripheral equipment designed specifically for the marine market. All AmbientNAV monitor products share a core design philosophy known as SeaEye Technology. SeaEye is a unique concept and is based upon the use of advanced engineering design principles and a unique mix of passive brightness enhancements and custom backlighting circuitry. The net result is a superior product in terms of both performance and life expectancy. The AmbientNAV product line has been developed and tailored to address the needs of the ever growing and technically sophisticated yachting industry. AmbientNAV's combination of top-shelf customer service along with its highly innovative product engineering is designed to maximize overall customer satisfaction and greatly enhance the boating experience.
